The effective use of ocean plastic waste and recycled plastic
JETSTREAM

First in the Stationery Industry!
 Eco-Mark Category No.164 "Products Made from Recycled Ocean Plastic Waste version 1" Certified Retractable type ball point pen made of almost 100% post-consumer materials

■ Efforts to Address the Ocean Plastic Problem
 There is a problem that plastic waste generated from daily life and economic activities covers the oceans and adversely affects the ecology of marine life.
 The ocean plastic waste collected in Japan is crushed and reused as the barrel of this pen.

■ Reuse empty disposable contact lens cases
 Empty disposable contact lens cases are made of polypropylene, a material suitable for recycling. Familiar materials that often seen on a daily basis are used as the materials for the barrel.
