ATD

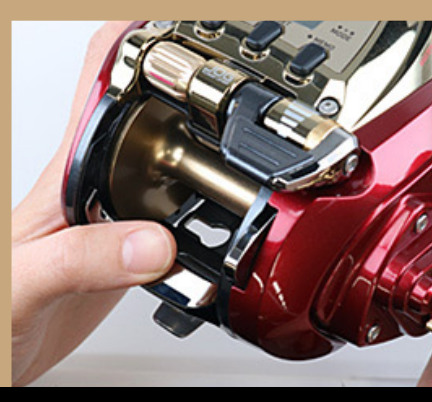

USABILITY TECHNOLOGY

JOG POWER LEVER / ALUMINUM JOG

The one-hand comfortable operation "JOG power lever" that does not give up the initiative in an instant operation is adopted. You can freely control the electric winding operation with one thumb.

One-hand comfortable operation JOG system

OFF

ON

Hoisting

From clutch OFF to ON and JOG winding with one left thumb. The power lever operation that picks up and winds with the right thumb and index finger is effective even when wearing gloves in cold climates.

FALL BRAKE DIAL

"Fall brake dial" that can instantly set the falling speed of the device. The large aluminum dial allows delicate operation even with wet fingertips.

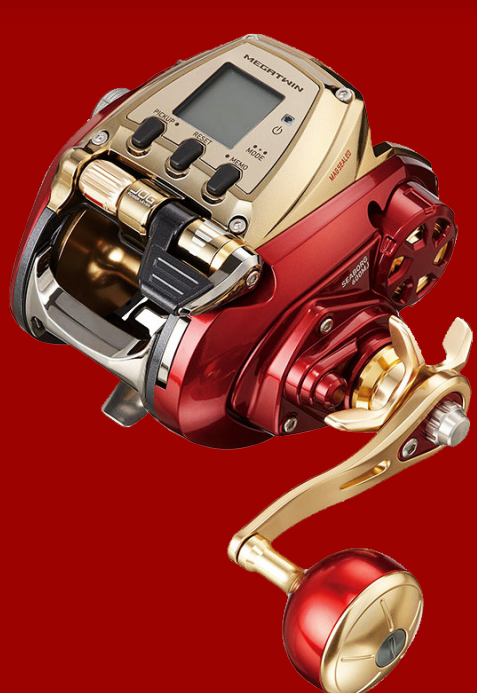

DENDO&RYOJIKU REEL MAGSEALED BALL BEARING

In electric reels, it is the easiest to salt and adopted for the side plate side spool shaft axis that is difficult to maintain. By realizing further waterproofness and durability, the initial performance is maintained.

DOT MONITOR

Adopts a large character screen with excellent visibility in the field and a dot liquid crystal that can be seen clearly even when using polarized glasses under direct sunlight. Equipped with convenient functions such as line input procedure and switching between Japanese and English.
