ROTARY GRIP

HOOK

The "EG Grip HD", which uses the thickest stainless steel hook in the series, is equipped with a rotary grip that rotates when a certain amount of force is applied and releases the force of the raging fish. It can be easily set in one motion, securely holds the mouth of the fish, and supports safe landing.

ROTARY GRIP

HOOK

The EG Grip SL is a mid-range model with a low price, but it is equipped with a lightweight and highly rigid slim shape body, a stainless steel slim hook with excellent holdability, and a rotary grip that rotates when a certain amount of force is applied to release the force of the raging fish. Full specifications. Its high practical performance is comparable to the EG grip series high-end model.
