

Telescopic series 40ST

Jet Setter

Line up

- Telescopic spinning rod Length: 1.2m Closing dimension: 32cm Line: ~6 pounds (PE No. 1)

Lure: 1-6 grams

The lightest spinning model in the telescope series with excellent portability. It's as small as a secret tool, and when folded, it's about 30 centimeters long, so you can fit it in the corner of your bag or suitcase, or even in your car door pocket.

50CT

Line up - Telescopic casting (bait) rod

Length: 1.52m Closing size: 34cm Line: ~12 lbs.

Lure: 3-14g

A short telescopic bait model that is extremely portable and can be carried anywhere, like a pocket sword.

With a short length of 5ft that can swing even in mountain streams, you can shorten the lure while setting it and perform mountain climbing or high winding, and you can cast immediately at the point you are interested in.

In addition, it is easy to handle with kayaks and floaters, and you can comfortably manipulate up to medium-sized lures for bass.

50ST

- Telescopic spinning rod Length: 1.52m

Closing size: approx. 34cm Line: ~10 lbs. Lure: 1~10g

Even blanks that feel tense will bend firmly when you tie a lure, and with the high accuracy that only a short rod can provide, you can enjoy fishing

as if you hit a short cast with a sharp hit.
