Line up

- Size: 50mm / Weight: Approx. 5.5g  
Original Color: 12 colors in total

#### ● Action: strong wobbling

By twitching while releasing the line slug, you can bring the threaded fish into a bite with a three-dimensional action.

## Arbor 40S

### Arbor 40S

Line up

- Size: 40mm / Weight: Approx. 4.0g  
Original Color: 5 colors in total

#### ● Action: High pitch rolling

A model mainly suited for fishing in mountain areas. It is smaller in size than the Arbor 50 series and specializes in making fish use their mouths. It makes it easier to operate during natural drifts and allows you to attack dips and slopes at a good tempo.

## Woodream Arbor series

#### ● Sinking model: Adopts wood with weight and durability in mind.

Wobbling = twitching & retrieving to produce weakened baitfish. It swims in a gentle S-shape across wide areas such as openings, deep pools, and lakes, inviting reaction bites with its delicate sliding action.

##### A: Body

Hand shaped and durable due to the hardwood body. Everything is about body design to maximize functionality.

##### B: Weight

Uses environmentally friendly tungsten weights.

##### C: Lip

Equipped with original board lip.

##### D: Hook

Owner adopted Cultiva.
