Quantity 4

FEATURES

FISHING SPECIES

Light game & rockfish
Shore jigging & casting

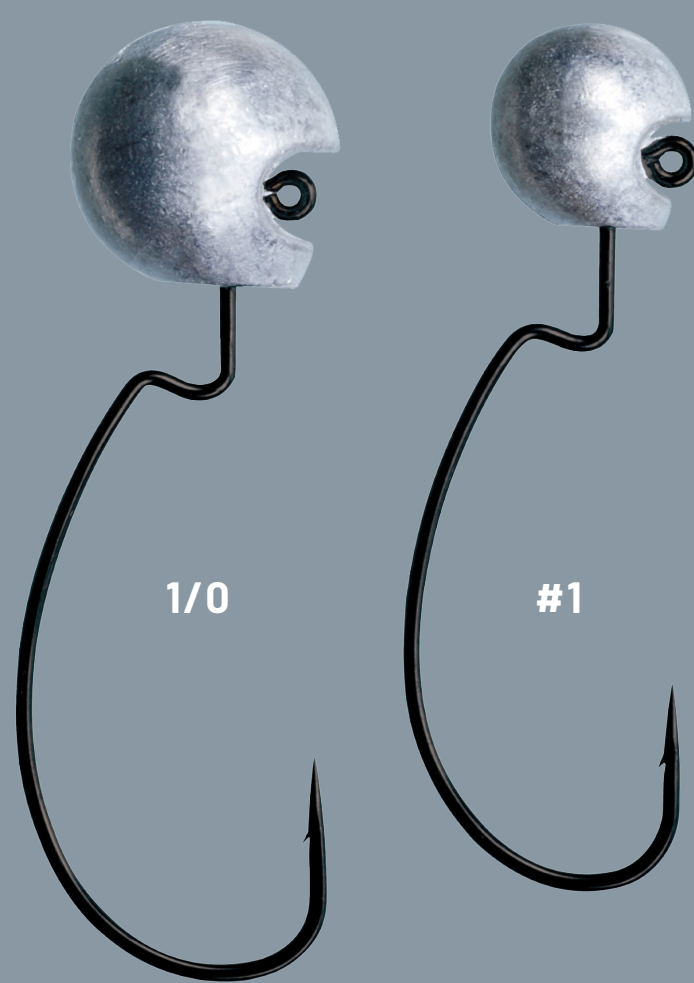

An offset hook type deformed round jig head designed to target large rock fish (greenling, soy) mainly in the Hokkaido, Tohoku, and North Kanto regions.

We paid particular attention to the head shape and the position of the center of gravity that easily produce the ability to detect the bottom and excellent swimming posture for the hook with excellent hardness and durability that uses "T.G.W". It can correspond to a wide range with abundant weight lineup.
