Length: 6ft 5in Weight: 44g Closing size: 99cm
Line: ~3lb Lure weight: ~5g

Aging rod [React] that realizes the pursuit of sensitivity and lightness by scraping off unnecessary things as much as possible.

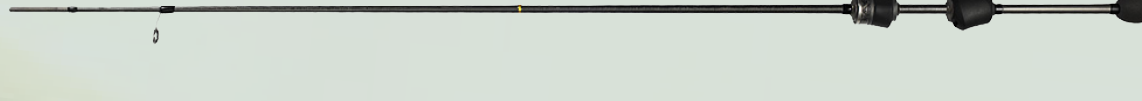

I want all anglers who pursue aging to get it.

Tetra Works Hagiwara

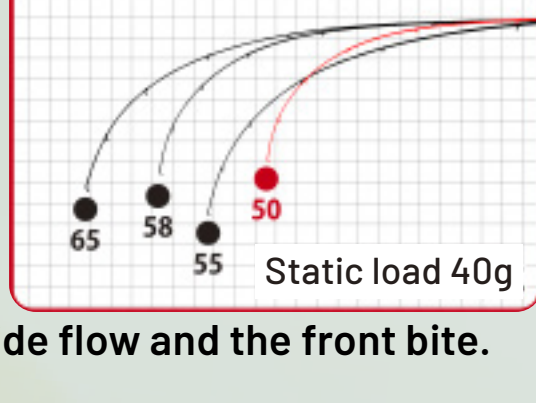

FEATURES

TECHNICAL DETAILS

TWRT-50 shooting model

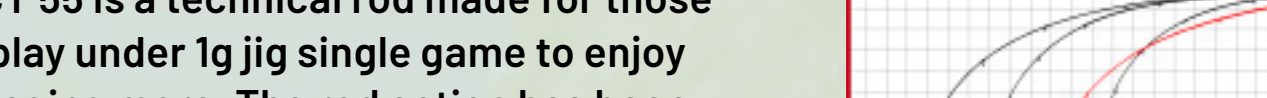

Shooting model mainly for jig head single game of under 1g. One recommended for those who mainly play jig single games at short distances. The solid part is 24t, #1 and #2 are both 40t, making the most of the characteristics of high-modulus carbon. The solid part uses a 0.6 mm ultra-fine solid so that you can see the tide flow and the front bite.

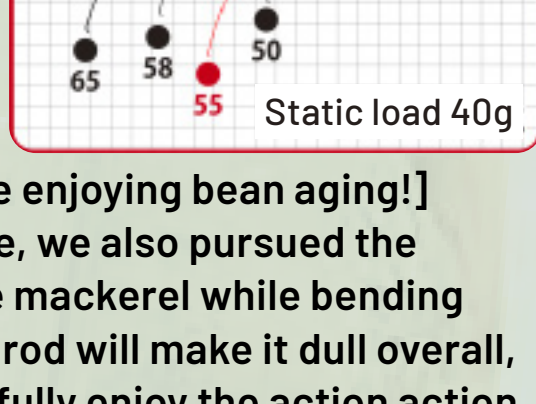

Blanks: Tip/24t carbon solid (260mm) Tip diameter/0.6mm #1, #2/40t carbon Specifications/Unsanded finish

Guide specifications: TOP/T-LFTT3 #1~#3/T-KTTG3 #4/T-KTTG3.5 #5/T-KTTG5 #6/T-ATTG10

TWRT-55 Technical Model

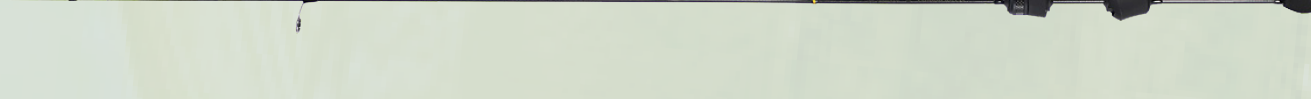

REACT 55 is a technical rod made for those who play under 1g jig single game to enjoy bean aging more. The rod action has been changed to bean horse mackerel direction so that it can be said that it is a different rod from the conventional React 50 / 65. The biggest concept of this React 55 is how [can you fish while enjoying bean aging!] This is all. While drawing a beautiful arc as a whole, we also pursued the sensitivity that allows you to feel the bite of horse mackerel while bending straight to the belly. However, simply bending the rod will make it dull overall, so we adjusted the taper balance so that you can fully enjoy the action action before hooking the fish and the crispness unique to React when hooking.

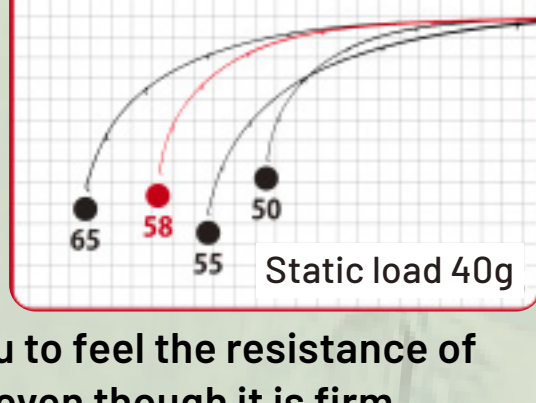

Blanks: Tip/24t carbon solid (300mm) Tip diameter/0.6mm #1/24t carbon tubular #2/30t carbon tubular Specifications/Unsanded finish

Guide specifications: TOP/T-LFTT3 #1~#3/T-KTTG3 #4/T-KTTG3.5 #5/T-KTTG5 #6/T-ATTG10

TWRT-58 Long Shooting Special

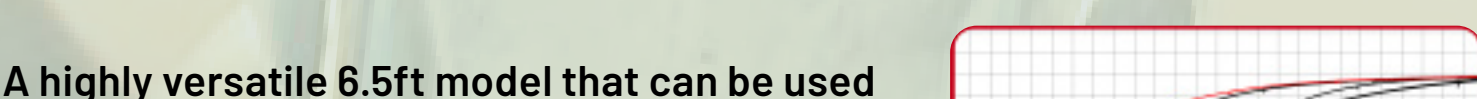

This "Long Shooting Special React 58" was created based on the previous condition of the React 50. You can feel the cast feel and flight distance that you wouldn't expect from a 5.8ft. Although it is a model that can be easily hooked even in deep areas where large fish are lurking at the tip of a full cast, the 0.6mm solid tip allows you to feel the resistance of the tide and the discomfort from horse mackerel even though it is firm.

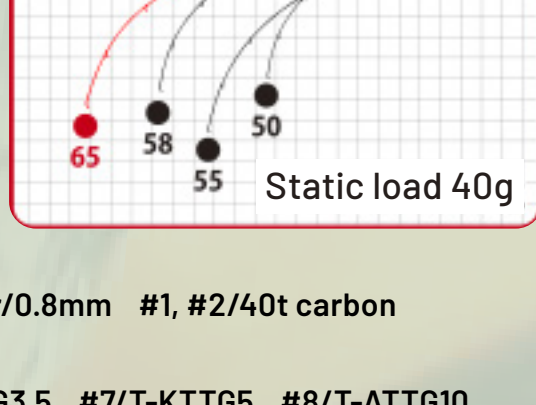

Blanks: Tip/24t carbon solid (276mm) Tip diameter/0.6mm #1, #2/40t carbon Specifications/Unsanded finish

Guide specifications: TOP/T-LFTT3 #1~#4/T-KTTG3 #5/T-KTTG3.5 #6/T-KTTG5 #7/T-ATTG10

TWRT-65 Versatile model

A highly versatile 6.5ft model that can be used from a single jig head to light caro and metal jigs. Both solid 24t #1 and #2 use 40t and highly elastic carbon, but we changed the way the blanks are wound so that they can handle caro and float, making the blanks sticky yet sharp.

Blanks: Tip/24t carbon solid (330mm) Tip diameter/0.8mm #1, #2/40t carbon Specifications/Unsanded finish

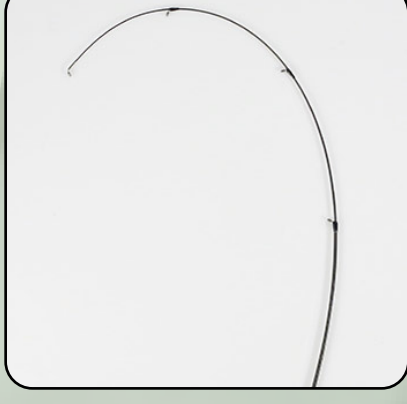

Guide specifications: TOP/T-LFTT3 #1~#5/T-KTTG3 #6/T-KTTG3.5 #7/T-KTTG5 #8/T-ATTG10

SPECIAL POINT

Original skeleton grip

In addition to trying to reduce weight, it is an original skeleton grip specification that emphasizes hand sensitivity and touches the blanks.

Ultra-fine solid tip

0.6mm solid tip that allows you to feel even the slightest changes. You can feel even a small bite without missing it with a sensitivity that can be said to be hypersensitive.
