Line up

- Sinking model
- Size: 70mm
- Weight: Approx. 14g
- Color: All 5 colors

FEATURES

A: Body

Hand shaped and durable due to the hardwood body.

The body design is all about maximizing functionality.

B: Weight

Uses environmentally friendly tungsten weights.

C: Hook

Owner Cultiva adopted.

Action

It forms an S-shaped meander with slow retrieves, and is difficult to jump out of the water even with high-speed retrieves.

With light jerking, it slides about 30cm to both sides, and with twitching, it makes tricky movements that flip it upside down, making the baitfish appear on the verge of death.

Targets include lake trout, sea cherry, sea candy, and pink trout.

Once you get used to it, it can also be used as a reservoir.

Sinking model

- Adopts wood with weight and durability in mind.

Fish with a natural charm, and with Twitch, you can enjoy the reaction bite.
