FEATURES

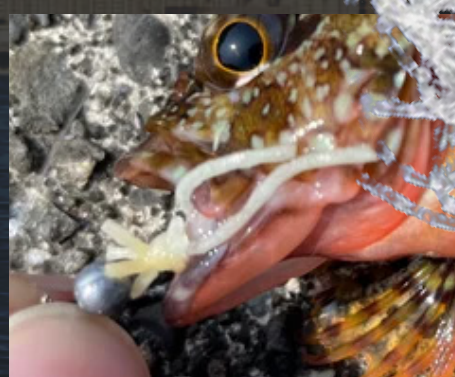

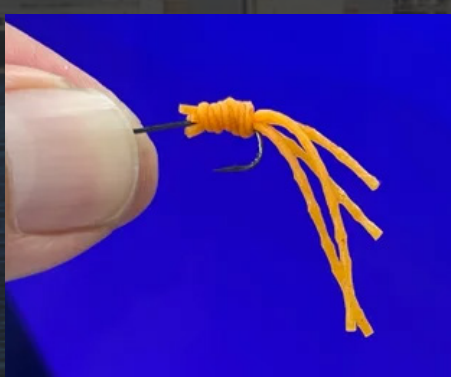

RAMEN WORM

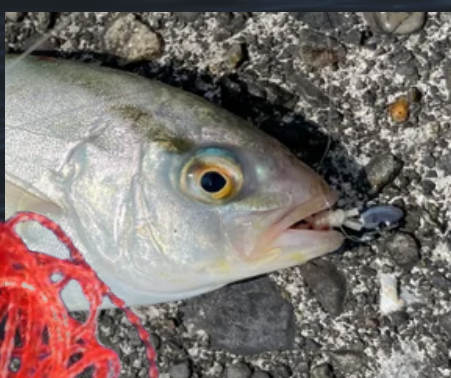

The Ramen Worm is a versatile bait that can be cut to preferred lengths for various uses. When cut short (1-2 centimeters), it can be fashioned into Sabiki hooks, resembling small fish for bait. When cut longer (2-5 centimeters), it can target even larger fish.

For example, when fishing for rockfish, you would use a thin line and small hook, attaching a Ramen Worm cut to 1-1.5 centimeters from the leader with a snelled knot. Then, manipulate it in the water with a floating and drifting motion. Combining a Ramen Worm with a jig head is also effective.

Made of high-quality elastomer material, it's incredibly strong and stretches well. Depending on the angler's creativity, it can be used in various ways, making it a versatile and enjoyable bait.
