Raptor-Z

When you're going after "monsters"!
RAPTOR-Z incorporates the latest hook making technology and BKK's legendary hand-crafting finishes. This is a hook that was designed with only one thing in mind: to hook strong and aggressive "monster" fish and stay hooked to the very end!

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

BKK's proud hook point processing technology insures the ultimate impaling power.

Short welded section increases the elasticity of the hook to reduce its possibility of being pulled open.

A wide gape and deep hook point design greatly reduces the chance of the hook coming off in the heat of combat.

Perfectly curved hook maximizes strength and resilience.

BKK engineers were asked to design a hook to tackle the strongest, most aggressive "Monster Fish" anyone could think of. The job requirement for a hook with not only superior impaling power and high hook-up ratio, but one that could also be super strong and highly resistant to corrosion. This is how the Raptor-X came to life.

In 2014, our company launched the new antirust coating technology, its hardness and salt corrosion resistance is the crown of all current plating coating.

Raptor-Z has pioneered the use of new anti rust coating products that keep hooks from rusting, maintaining the original sharpness.
