FEATURES

Fishing Boat Captain Creates on Site

IKA RUBBER - A rubber lure imitating squid, a favorite prey of fish eaters. The "Real Squid Eye," designed to replicate the eye of a real squid, strongly stimulates the predator's instincts, leading to successful bites.

- Rolling action during slow to medium retrieval mimics a fleeing squid.
- Flutter action during a stationary pause automatically triggers an enticing movement.

The rubber and hook section uses parts produced by the fishing boat "Seven," featuring a three-tiered hook design for secure hooking. It' s built with reliable strength to handle unexpected big catches.
